

FACT SHEET

TRAVELLING TO THE COCOS KEELING ISLANDS

As of 10th May 2022

The IOT travel application form to support local entry requirements has been reviewed and a new, streamlined form is now available for travellers.

The new form supports a much shorter, simpler and streamlined application process, which applicants should find takes less time to complete.

The release of the new form follows a number of policy changes to local COVID response and management.

As well as simplifying the initial application process, it will also allow travellers to submit their pre and post arrival rapid antigen testing results online and quickly.

The changes will benefit all parties by assisting the more efficient and timely processing of travel applications.

Form security, data and privacy protection has also been enhanced.

The new forms are available below:

- IOT travel application form: <https://bit.ly/Travel2IOT>
- Submit your RAT result: <https://bit.ly/Submit-RAT>
